All the work on this exam is my own. (please sign)

0. Your thoughts? How are you feeling this week?
1. **Yes, No, but Sometimes Maybe?**

Fill in the environment diagram that results from executing the code below until the entire program is finished, an error occurs, or all frames are filled. *You may not need to use all of the spaces or frames.*

A complete answer will:

- Add all missing names and parent annotations to all local frames.
- Add all missing values created or referenced during execution.
- Show the return value for each local frame.

*You must list all bindings in the order they first appear in the frame.*

```python
def yes(no):
    yes = 'no'
    return no
no = 'no'
def no(no):
    return no + yes(no)
yes = yes(yes)(no)('ok')
```
