

INSTRUCTIONS

- You have 5 minutes to complete this quiz.
- The exam is closed book, closed notes, closed computer, closed calculator.
- Mark your answers **on the exam itself**. We will *not* grade answers written on scratch paper.
- For multiple choice questions, fill in each option or choice completely.
 - means mark **all options** that apply
 - means mark a **single choice**

0. **Your thoughts?** If Cal's mascot was a turkey, what would be its name?

1. Tree Time

Fill in the square to the left of each line if *removing the line* would help pass the doctests. In the space to the right, briefly describe why each line should be removed. *Remove as many lines as possible.*

Recall: The special method `__iter__` is called by the built-in `iter()` and should return an iterator.

`IterableTree.__iter__` is a generator that yields the root value of the tree and then each value in its branches.

```
class Tree:
    def __init__(self, label, branches=()):
        self.label = label
        self.branches = list(branches)

    def is_leaf(self):
        return not self.branches
```

- `class IterableTree:`
- `class IterableTree(Tree):`
- `def __init__(self, label, branches=()):`
- `Tree.__init__(label, branches)`
- `Tree.__init__(self, label, branches)`
- `def __iter__(self):`
 `"""Yield the entries of this tree.`

 `>>> T = IterableTree`
 `>>> t = T('A', [T(2, [T('C'),`
 `... T(4)],`
 `... T('E', [T(6)])])`
 `>>> list(t)`
 `['A', 2, 'C', 4, 'E', 6]`
 `"""`
- `yield self.label`
- `yield label`
- `for branch in self.branches:`
- `branch = iter(branch)`
- `for label in branch:`
- `for label in branch():`
- `yield self.label`
- `yield label`
- `yield self.label`
- `yield label`
